CCAP Biannual Report Annexes (Rural and Urban) (From 21st December 2019 to 20th June 2020)

4.	. Annexes	2
	ANNEX A: Results Framework	2
	ANNEX B: DETAILED OUTPUT DATA	10
	ANNEX C: PROVINCE WIDE IMPLEMENTATION PROGRESS ON KEY OUTPUTS	14
	ANNEX D: FP WIDE IMPLEMENTATION PROGRESSS ON KEY OUTPUTS (RURAL)	15
	ANNEX E: MSSSCORECARD PROCESS, INDICATORS AND RESULTS	17
	Annex F: Reports on Training Sessions Conducted (Urban)	24
	ANNEX G: MCCG detailed progress	28
	ANNEX H: Dastarkhan-e-Milli pilot report in CCAP areas	
	ANNEX I: Detailed monitoring findings on rural	33
	ANNEX J: Detailed Public Communication Progress on rural	39
	ANNEX K: Grievances detailed breakdown (Rural and Urban)	56
	ANNEX L: High Risk area Implementation report	57
	Security Report	64

4. ANNEXES

ANNEX A: Results Framework

Table A

SN	Indicator Name	Unit of Measureme nt	Baseline	Cumulative up to end of previous reporting period	Progress during the reporting period	Cumulative Up to the end of the reporting period	Overall target	Remarks
				Project Development Inc	licators (PDOs)			
1	Rural Direct project beneficiaries	#	0	11,637,049	357,061	11,994,110	10,000,000	
	Urban Direct project beneficiaries	#	0	1,406,567 population in 191,942 households in 845 communities	Urban =7,877 population In 412 households= in 4 communities	Urban = 1,414,444 population in 192,354 households in 850 communities	10,000,000 (for urban and rural)	For this report, we have defined this as the total population in the communities with CDPs completed under the Citizens' Charter.
1.1	Rural Female beneficiaries	%	0	49.15	49.75	49.17	50	
	Urban Female beneficiaries	%	0	49.5	49.47	49.47	50	

2 2.a	Number of CDCs in rural and urban areas able to plan and manage their own development projects Rural CDCs able to plan and manage their own development projects	#	0	11,537	298	11,835 CDP Plan with 9,825 SP Financed in 6,375 CDCs	11,750	
2.b	Urban CDCs able to plan and manage their own development projects	#	0	845 CDCs developed their CDP, 788 CDCs have at least one approved subproject and 864 sub-projects are financed	5 CDCs developed their CDP, 62 approved subproject and 80 sub-projects are financed	850 CDCs developed their CDP, 850 CDCs have at least one approved subproject and 944 sub- projects are financed	750	The figure for this indicator is based on the CDP as when a community develops its CDP that means it is able to plan its development project while successful management depends on the successful completion of the projects.
3	Number of communities meeting all minimum service standards	#					9,600	
3.a	Rural communities meeting all minimum service standards	#	0	2,206	182	2,388	9,000	
3.b	Urban communities meeting all minimum service standards	#	0	474 CDC (Health:643 , Education: 621)	0	474 CDC (Health:643 , Education: 621)	600	Due to COVID-19 the cities were lockdown and fourth round of scorecards have been not fill.
4	Number of targeted high IDP/returnee Rural and	#	0	642	45	687	2,200	As urban Citizens' Charter does not

	Urban communities provided with emergency support							have MCCG and SIG, we have interpreted this as the number of communities that have received UAB grants and have over 5% of their total population comprised of IDPs and/or returnees
4.a	Number of rural targeted high IDP/returnee communities provided with emergency support	#	0	1169	414	1,583	2,000	
4.b	Number of targeted urban high IDP/returnee communities provided with emergency support	#	0				200	
				Intermediate Ro	esults			
1	Rural areas - Number/Type of rural subprojects completed (for water points, roads, irrigation, electricity)	#	0	1,585	1,498	3,083	9,000	
2	Urban areas - Number/type of urban subprojects completed (drainage, streets, street lighting, parks)	#	0	454 Power Supply=20, Water Supply & Sanitation = 29, and Road/Street = 401, Park and recreation Area= 4)	83	537 Power Supply=22, Water Supply & Sanitation = 29, and Road/Street = 481, Park and recreation Area= 5)	600	537 subprojects have been completed so far

3.a	Rural areas - Number of people (male/female) benefitting from each type of subproject (access to water, roads, irrigation and electricity)	#	0	Water Supply= 1,772,020 Grid Extension= 13,983 Renewable Energy= 7,701 Transport (roads & bridges)=44,561 Irrigation: 1,208,529	Water Supply= 311,134 Grid Extension=19, 636 Renewable Energy= 15,533 Transport (roads & bridges)= 29,272 Irrigation: 254,048	Water Supply=2,083,154 Grid Extension=33,619 Renewable Energy= 23,234 Transport (roads & bridges)= 73,833 Irrigation: 1,462,577	TBD	Over 3.67 million people are benefiting from the 3,077 completed sub- projects in the rural communities
3.b	Urban areas - Number of urban residents (male/female) benefitting from each type of subproject (drainage, streets, street lighting, parks)	#	0	Water Supply and Sanitation = 69.720; Road/Street Upgrading and Drainage = 1,301,944 Power Supply 65,492 Park & Recreation Area = 10,955	Water Supply and Sanitation = 6,412Road/Stre et Upgrading and Drainage = 85,949 Power Supply = 24,106 Park & Recreation Area =2,105	Water Supply and Sanitation = 76,132; Road/Street Upgrading and Drainage = 1,387,893 Power Supply 89,598 Park & Recreation Area = 13,060	TBD	This is based on 873 financed subprojects as in quarterly report. Total population of the communities has been considered as beneficiaries.
4	% of sampled community respondents (male/female) satisfied with subproject/grant investments	%	0	72	0	72	60	72% as per as The Asia Foundation 2018 baseline survey

	T		1 .		T			
5	% of CDCs initiating	%	0	37	100	85	35	10,249 Communities
	activities to benefit							established Grain
	marginalized and							Banks and completed
	vulnerable groups such as							"Stop Seasonal Hunger
	women, IDPs/returnees (in							Campaign" out of
	addition to service							11,841 elected
	standards)

21	Number of vulnerable female-headed households benefitting from social inclusion grant	#	0	1,075	7,135	8,210	10,000

Sub-projects by sector (Rural)

Table B1: Irrigation

Urban/ Rural	Sector/ SP type	Output unit	# of estimated units in the approved sub- project proposals	# of actual units in the completed sub-projects
Rural	Irrigation - Canal Construction	Jereeb	13,613	540
Rural	Irrigation - Canal PCC Lining Construction	Length Meter	1,298	
Rural	Irrigation - Canal Rehabilitation	Jereeb	2,323,529	485,205
Rural	Irrigation - Canal Stone Masonry Lining Construction	Length Meter	1,200	
Rural	Irrigation - Gabion Wall Construction	Length Meter	10,312	1,890
Rural	Irrigation - Pipe Scheme Construction	Jereeb	32,328	3,090
Rural	Irrigation - Protection Wall Construction	Length Meter	142,073	38,170
Rural	Irrigation - Water Reservoir Construction	M3	502	
Rural	Irrigation - Weir Construction	Length Meter	40	

TableB2: Renewable Energy and Grid Extension

Urban/ Rural	Sector/ SP type	Output unit	# of estimated units in approved sub-project proposals	# of actual units in completed subprojects
Rural	Renewable Energy - Micro-Hydro Power Plants (<100KW) Construction	Kilowatt	2,432	28
Rural	Renewable Energy - Micro-Hydro Power Plants (<100KW) Rehabilitation	Kilowatt	39	
Rural	Renewable Energy - Solar Mini Grid System Installation	Kilowatt	9,782	95
Rural	Grid Extension - Power line Extension	Length of 20KV	730	23
Rural	Grid Extension - Transformer Installation	Number	32	1

Table B3: Transport:

Urban/ Rural	Sector/ SP type	Output unit	# of estimated units in approved sub-project proposals	# of actual units in completed
Rural	Transport (Road & Bridge) - Box Culvert Construction	Number	239	12
Rural	Transport (Road & Bridge) - Box Culvert Rehabilitation	Number	1	
Rural	Transport (Road & Bridge) - Causeway Construction	Length Meter	67	
Rural	Transport (Road & Bridge) - Concrete Retaining Wall Construction	Length Meter	290	
Rural	Transport (Road & Bridge) - Gabion Retaining Wall Construction	Length Meter	241	
Rural	Transport (Road & Bridge) - Pathway Construction	Length Meter	8,100	
Rural	Transport (Road & Bridge) - Pathway Rehabilitation	Length Meter	2,850	

Rural	Transport (Road & Bridge) - Pedestrian RCC Bridge Construction	Length Meter	230	22
Rural	Transport (Road & Bridge) - Pedestrian RCC Bridge Rehabilitation	Length Meter	17	
Rural	Transport (Road & Bridge) - Pedestrian Steel Bridge Construction	Length Meter	13	
Rural	Transport (Road & Bridge) - Pedestrian Suspension Bridge Construction	Length Meter	75	
Rural	Transport(Road & Bridge) - Pipe Culvert Construction	Number	10	
Rural	Transport (Road & Bridge) - RCC Bridge Construction	Length Meter	605	
Rural	Transport (Road & Bridge) - RCC Bridge Rehabilitation	Length Meter	13	
Rural	Transport (Road & Bridge) - Slab Culvert Construction	Number	126	
Rural	Transport (Road & Bridge) - Stone Masonry Retaining Wall Construction	Length Meter	8,320	487
Rural	Transport (Road & Bridge) - Stone Masonry Retaining Wall Extension	Length Meter	58	
Rural	Transport (Road & Bridge) - Stone Masonry Side Ditch Construction	Length Meter	1,617	
Rural	Transport (Road & Bridge) - Suspension Bridge Construction	Length Meter	65	
Rural	Transport (Road & Bridge) - Tertiary Road Basic Access	Kilometer	1,029	140
Rural	Transport (Road & Bridge) - Tertiary Road Gravelling	Kilometer	304	48
Rural	Transport (Road & Bridge) - Tertiary Road Rigid Pavement	Kilometer	27	

TableB4: Water Supply, Sanitation and Hygiene

Urban/ Rural	Sector/ SP type	Output unit	# of estimated units in approved subproject proposals	# of actual units in completed subprojects
Rural	Water Supply, Sanitation and Hygiene Education - (Kanada) water reservoir construction	M3	26,487	16,399
Rural	Water Supply, Sanitation and Hygiene Education - (Pool) water reservoir construction	M3	46,902	14,742
Rural	Water Supply, Sanitation and Hygiene Education - by gravity water supply network construction	Num (of public stand tap)	9,241	2,201
Rural	Water Supply, Sanitation and Hygiene Education - by gravity water supply network extension	Num (of public stand tap)	599	110
Rural	Water Supply, Sanitation and Hygiene Education - by gravity water supply network extension	Number	2	
Rural	Water Supply, Sanitation and Hygiene Education - by gravity water supply network rehabilitation	Num (of public stand tap)	289	47
Rural	Water Supply, Sanitation and Hygiene Education - Digger shallow well-digging	Number	2,150	478
Rural	Water Supply, Sanitation and Hygiene Education - elevated water reservoir construction	Num (of public stand tap)	204	96
Rural	Water Supply, Sanitation and Hygiene Education - filtration chamber construction	M3	80	80

	underground water reservoir construction	tap)	363	57
Rural	Water Supply, Sanitation and Hygiene Education -	Num (of public stand		
	underground water reservoir extension	tap)	4	

Table B5: Urban Subprojects

Urban/ Rural	Sector/SP Type	Output units	Total estimated output	Total actual output
Urban	Park & Recreation Area - Boundary wall Park	Length Meter	1,734	
Urban	Park & Recreation Area - Green area	Number	1,042	
Urban	Park & Recreation Area - Boundary wall Park	Number	2	
Urban	Park & Recreation Area - Electricity and Lighting	Number	10	
Urban	Park & Recreation Area - Water Reservoir	Number	2	
Urban	Park & Recreation Area - Park and Green Area	Square Meter	5,914	

Urban	Park & Recreation Area - Water well (shallow, deep)	Number	45	
Urban	Park & Recreation Area - Sanitary Toilets	Unit	6	
Urban	Park & Recreation Area - Fountain	Unit	1	
Urban	Power Supply - Installation of Poles	Number	361	
Urban	Power Supply - Grid Extension	Kilometre	8	
Urban	Power Supply - Grid Extension	Length Meter	4,935	
Urban	Power Supply - Installation of transformer	Number	25	
Urban	Power Supply - Transmission/Distribution line	Length Meter	44,735	
Urban	Power Supply - Transmission/Distribution line	Kilometre	62	
Urban	Power Supply - Provision of Solar Power	Number	137	
Urban	Road/Street Upgrading and Drainage - Street Pavement (PCC)	Length Meter	1,267	
Urban	Road/Street Upgrading and Drainage - Box Culvert	Number	905	
Urban	Road/Street Upgrading and Drainage - Houses concrete Street	Width meter	770	
Urban	Road/Street Upgrading and Drainage - Stone Masonry Side Ditch	Length Meter	1,504	
Urban	Road/Street Upgrading and Drainage - RCC Slab	Number	384,146	
Urban	Road/Street Upgrading and Drainage - Sidewalk	Average Area Square Meter	2,287	
Urban	Road/Street Upgrading and Drainage - Street Pavement (Other)	Length Meter	5,783	
Urban	Road/Street Upgrading and Drainage - Pathway-1	Length Meter	45,545	
Urban	Road/Street Upgrading and Drainage - Pathway (PCC)	Total Length Meter	17,504	
Urban	Road/Street Upgrading and Drainage - Stone Masonry drainage	Length Meter	619	
Urban	Road/Street Upgrading and Drainage - Tree Sapling along street	Number	300	
Urban	Road/Street Upgrading and Drainage - Sidewalk	Length Meter	27,248	
Urban	Road/Street Upgrading and Drainage - Pipe Culvert	Number	42	
Urban	Road/Street Upgrading and Drainage - Tertiary Road	Width meter	1,094	
Urban	Road/Street Upgrading and Drainage - Houses concrete Street	Length Meter	410,633	
Urban	Road/Street Upgrading and Drainage - Street Pavement (Asphalt)	Length Meter	4,680	
Urban	Road/Street Upgrading and Drainage - Secondary Road	Width meter	7	
Urban	Road/Street Upgrading and Drainage - Secondary Road	Kilometre	260	
Urban	Road/Street Upgrading and Drainage - Concrete Side Ditch	Length Meter	1,129,093	
Urban	Road/Street Upgrading and Drainage - Slab Culvert	Number	42	
Urban	Road/Street Upgrading and Drainage - Tertiary Road	Kilometre	3,604	
Urban	Road/Street Upgrading and Drainage - Iron grill	Length Meter	47,713	
Urban	Road/Street Upgrading and Drainage - Stone Masonry Retaining Wall	Length Meter	25,591	
Urban	Water Supply and Sanitation - Water Supply Network	Kilometre	26	
Urban	Water Supply and Sanitation - Water Supply Network	m/Km	73,198	
Urban	Water Supply and Sanitation - Water Supply Scheme	m/Km	17,377	

Urban	Water Supply and Sanitation - Sedimentation Tank	Number	6	
Urban	Water Supply and Sanitation - Pump house	Number	2	
Urban	Water Supply and Sanitation - Water Supply Scheme	Kilometre	7	
Urban	Water Supply and Sanitation - Hand pump	Number	12	
Urban	Water Supply and Sanitation - Water Reservoir (Tower)	Cubic Meter	94	
Urban	Water Supply and Sanitation - Well (Shallow, Deep)	Number	17

Trainings Conducted by Engineerig Unit:

During the reprting period, conducted online training for all PIU, PMUs and chief engineers from FPs. The total engineers trained in this period is 46. The detail is as follow:

S/N	Days	Dates	Subject	Time (AM)
1	Saturday	9-May	Rigid Road Maintenance	10-12
2	Monday	11-May	Importance of Infrastructure	10-12
3	Thursday	14-May	Project Implementation	10-12
4	Sunday	17-May	Water and Sanitation	10-12
5	Wednesday 20-May		CCAP subprojects' stakeholders &	10-12
			Stakeholder Management	
6	6 Sunday 3		Basics of Rigid Pavement & Constructing	9:30-12
			materials	
7	Wednesday	3-Jun	General Management	9:30-11:30
8	Saturday	6-Jun	Improvement of green Infrastructure	8:30-10:30
9	9 Tuesday 9-Jun		Gender and Infrastructure	8:30-10:30
10	Thursday	11-Jun	Role of energy sector in economy	8:10-10:30

Table E1: Communities that reported overall MSS Scorecard in all three rounds

Overall Infrastructure, Education and Health MSS Scorecard comparison among three rounds for the same reported								
CDCs								
# of communities reported 1 st , 2 nd and 3 rd round	1st round Meet	2nd round Meet	3rd round Meet					
1,309	177	274	278					
%	13%	20%	21%					

Table E2: Communities reported in the first and second round of overall MSSs

_	able 22. communices reported in the mot and second re	Jana or overall liles						
ĺ	Overall Infrastructure, Education and Health MSS Scorecard comparison between two rounds for the same reported							
	Communities							
	Communities reported in the 1st and 2nd Round 1st Round MSS Meet 2nd Round MSS Meet							
Ī	8,683	1,633	2,403					
ŀ	0/	100/	270/					
	%	19%	27%					

In the both, third round comparison and secondround comparison the number of communities meet all MSSs showed improvement. There are improvements reported from the first round of the scorecard to the second round and similiarly from second to the third round, which went up from 13% from the first round to 21% in the third round.

Figure 1: Comparision of Overall MSSs 1st and 2nd rounds

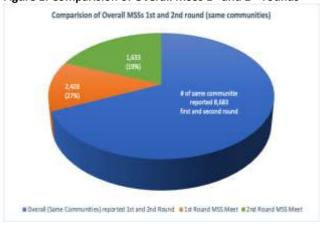

Table E3: Infrastructure MSSs (Indicators):

Minimum Service Standards (Infrastructure) for Rural Areas

- 1. Universal access to clean drinking water: Is there one water point available per 25 households?
- 1.1. Is water point providing 25 litres of water per person per day?
- 2. Basic electricity: Does each household have access to 100W per household through solar, micro hydro, biogas or wind (only in areas that cannot be reached by the grid)?
- 3. Basic road access: Does the community have access within two kilometers walking distance from the nearest accessible rural road (accessible areas only)?
- 4. Small-scale irrigation infrastructure: Does the community need small-scale irrigation infrastructure? This includes intakes (for secondary/tertiary canals), water divider, water control gates, siphon, water reservoir up to 10,000 M3 capacity, rehabilitation or construction of small irrigation canal, protection wall, gabion wall, aqueducts, and super passage.

Table E4: Infrastructure MSS Status (Comparison between two rounds)

# of Communities (same) Reported (1st and 2nd Round)	1st Round Meet	2nd Round Meet
8,320	2,867	3,460
	34%	41%

Table E5: Infrastructure MSS Status (Comparison between three rounds)

# of Communities (same) Reported (1st, 2nd and 3rd Round)	1st Round Meet	2nd Round Meet	3rd Round Meet
2,270	847	1,053	1,180
	37%	46%	51%

The communities' access to clean drinking water and one of the three infrastructure (road, irrigation, and power) that reported for the three rounds (Table E5) of scorecard improved by 14% from 37% inthe first round to 51% in the third round.

Table E6: Education MSS Status:

Table Lot Laddaton thos status					
Minimum Service Standards for Rural Areas (Education MSSs)					
1. Are Education MSS clearly posted at the school?					
2-Do teachers have at least grade 12 education?					
3 -Do students have 24 hours per week of education in grade 1-3?					
4-Do students have 30 hours of education in grade 4-6?					
5-Do students have 36 hours of education in grade 7-12?

108	1,442	83	1,163	85	1,128	87	1,103
	%	76%	80%	78%	78%	80%	76%

There is overall 6% improvement in the services delivery in the health sector MSSs.In total 445 health centers reported improvements in the first and second rounds. This change is from 78% from the first round to 84% in the second round (See table E10). In the total 108 scorecards reported (see Table E11), a 4% improvements can be seen in in the services provision from 76% in the first round to 80% in the third round.

Grand Total	472	389	100

MSS Scorecard Overview and Process:

The Scorecards contain 3 separate sections for rural communities (Community Infrastructure MSS, Education MSS, and Health MSS) and 2 separate sections for urban communities (Education MSS and Health MSS). These should be completed every six months:

- The <u>Education and Health Scorecards</u>: is managed by health and education Scorecard Committees. These committees are formed based on discussion with Cluster CDC/Gozar Sub-Committees (School Management Shura (SMS) or Health Facility Shura) or CDC health and education subcommittees, to ensure representation of each community who uses the facility in the scorecard committee. The committees are supported by their male and female SOs.
- The <u>Community Infrastructure MSS Scorecard</u> section measures the basic MSS (Universal Access to Clean Water, Basic Road, Basic Electricity, and Small-Scale Irrigation) at the Community level. The CDCs members manage the community infrastructure MSS scorecard. (Rural areas only)
- <u>Specific services user groups</u> (mothers with infants, women of child-bearing age, illiterate parents, etc.) must be provided an opportunity to rate agreed services standards.
- <u>Community feedback</u> to school and clinic management is fundamental and provides the basis for dialogue about the expectations of services users and how these are met (or not).
- The <u>findings / scores must be shared</u> by the Scorecards Committee/FP with each of the communities that are rating the school or clinic and the facility management. The CC SOs will ensure that the scores are provided to the Citizens' Charter District Manager, who is responsible for and oversees the MIS data entry and passes the scores to the PMU Manager and District Governors' Office.
- Follow up is done at the quarterly District Citizens' Charter Management Committee meetings (rural) and the Municipality Citizens' Charter Management Committee meetings (urban). Six months follow up, to review changes (or not) from one score card round to the next and ensure resolution of services standards violations, is done at the District Citizens' Charter Management Committee meetings. District Citizens' Charter Management Committee (DCCMCs) are organized by MRRD in coordination with DGO, PCCMCs are organized by MRRD and IDLG in coordination with PGO. MCCMCs are organized by IDLG in coordination with municipality. Ultimately, the aggregated findings are presented to the High Council on Poverty Reduction and Citizen Engagement.

TableE13: Infrastructure MSSs indicators status by # and %

Infrastructure Scorecard indicators	1st Period Meet (out of 11,007 reported communities)	2nd Period Meet (out of 8,377 reported communities)	3rd Period Meet (out of 2,309 reported communiti es)
Universal access to clean drinking water: Is there one water point	3,736	3639	1,238
available per 25 households? / Is water point providing 25 litres of water per person per day?	34%	43%	54%

Jalalabad	29/2/2020	18/3/2020	Peace Pilot	Peace Pilot	2CDC	N/A	PMU,FP and Municipality staff

Implementation of Peace Initiative Project in Jalalabad city (Urban):

A three-member team of training & capacity building unit had a mission to Jalalabad city from 25/2/2020 to 18/3/2020 for implementation of peace pilot project in two CDCs, district 8, Jalalabad city and conducting one day orientation training on 1st March 2020 Sunday in this regard, for PMU, Municipality and FP staff which included 17 participants (14 males, 3 females). Firstly, the team held a detailed meeting with mayor and district 8 elders who were briefed on peace project and their support and cooperation was requested to ensure smooth and successful implementation of the pilot. The mayor and district head promised their full support and introduced a focal point from municipality side who will jointly be involved in pilot implementation.

Prior to deploying teams to the field for starting practical work on peace pilot, a detailed meeting was held with PMU ssocial, M&E and engineering team to orient them on how to proceed on the peace pilot implementation and what points are to be considered during the pilot in order to have a clear picture and guideline when implementing the social part of 35 targeted CDCs.

On 3rd and 4th Feb 2020, a joint team of PIU and PMU organized a large meeting with the communities, that were selected for peace project, in consultation with the relevant district elders, the meeting participants were 120 people including 90male and 30 female members of communities of the two pilot CDCs.

Household survey and CDCs Election (Urban):

On 05 March 2020, the team started household survey of the two pilot CDCs and on 08 March 2020 elections conducted for selecting the two CDCs members and office bearers.

Training session for communites female members

Training session for communites male members

Large gathering with the communty members

Election process of CDCs members and office bearers

Key Achievements:

- Verified more than 5000 training reports
- Adapted and urbanized 5 pages of rural COVID 19 step by step guideline to urban level.
- Reviewed and proofread the final printed documents of All CCAP training topics (1st, 2nd and 3rd rounds)
- Collected and translated well-being analysis forms from provinces for preparing a requested report to World Bank
- Develop a professional guide for CCAP / EZ-Kar / Peace pilot project during COVID 19 disease outbreak
- Prepared peace implementation plan of 35 CDCs during the fiscal year 2020 (from community mobilization to CDPs completion stages)
- Developed and revised linkage and cross visit package which includes PPT and its forms.
- Held a session with DMM Knowledge Management Committee on municipalities' role and responsibilities in establishing peace and democratic cities

Next Quarter Plans:

- Developing peace pilot project training material
- Implementing peace pilot project in Jalalabad city
- Data verification of those training reports of CCAP program are conducted by FP to communities
- Following up of social and training related issues in the targeted cities.

Impact analysis of COVID-19 disease by 20th June 2020 (Urban):

Coronavirus disease (COVID-19) in Afghanistan is a migrated disease when Iran government forced the Afghan refugees to leave Iran, this has caused the Afghan returnees influx (daily about 15 thousand) to different provinces of Afghanistan especially in Herat. The Afghan Government had not any preparations or arrangements to deal with this situation, so, the affected returnees without any obstacles resettled in their homes and villages.

By end of the reporting period, Afghanistan's Ministry of Public Health authorities have confirmed 29,157 positive cases of COVID-19 disease in different provinces of Afghanistan of which 8,841 has been recovered and 598 has been killed by this virus. The minister of MoPH has

forecasted that, if people do not obey the instructions given by MoPH, there is the probability of infecting 16 million Afghans with this fatal virus and the probability of death cases will be 110 thousand people. This needs the attention of all stakeholders and specially those working for Emergency responses.

Currently, 440 male and 117 female are working in CCAP and FPs, it is to be mentioned that, there is positive reported cases of COVID-19 among the programs and Facilitating Partners' staffs, and the risk of Covid-19 is high as the program social mobilization requires the gathering of large number of people. It is difficult to forecast the effect of Covid-19 on the program implementation process, but for sure the COVID-19 was a big challenge to program implementation and facilitations. Based on the instruction of MOPH and local authorities and to control spread of COVID-19, all soft component activities which need mass people gathering have been postponed. To ensure program staffs' safety, the programs and the partners based on the IARCSC guideline and MOPH instructions has taken the following measures to control spread of COVID-19:

- Three working hours have been reduced; currently the official working hours in the offices are from 7 AM to 01 PM.
- The pregnant or breast-feeding women staff and staff who are above 58 years have given the permission to stay at home and conduct online his/her official works
- The crowded meetings have been reduced to minimum staff participation or are conducted through video conferences.
- Training delivery to staff, community and partners, conducting Community Participatory
 Monitoring (CPM) and Social Audit, exercise of Institutional Maturity Index (IMI) and
 scorecard for health and education, conducting CDC and GA exposure visits and linkages,
 conducting MCCMC and PCCMC meetings, project opening and closing ceremonies,
 activities of Women Livelihood Projects, conducting written test for recruiting new staff
 are banned.

Mostly, the administrative work has been slowed down because of applying new precaution measures, such as:

- Frequency of meetings reduced to minimum possible meetings, staff participation in the meetings limited,
- Teamwork activities canceled or taken place several times with different group of people,
- Interaction with community members reduced,
- FPs and PMUs monitoring visits to CDCs and GAs has been reduced.

Government of the Islamic Republic of Afghanistan Ministry of Rural Rehabilitation and Development Citizens' Charter National Priority Program Capacity Development Division and Provincial Management Units

May/June 2020

Full report on piloting Food Relief Provisions in CCAP Communities

1. Introduction

The COVID 19 crisis will exacerbate poverty and further push households into periods of prolonged hunger as a result of reduced migration, lost work opportunities, and high food prices. During the past few years, the number of households that face seasonal hunger during the winter period has increased to some 60% (with some regional variation) and in all likelihood, the number of households faced with insufficient food or a lack of purchasing power to buy food has increased to 90 percent or more. To address this dire situation, the Government of Afghanistan will implement a national strategy to provide relief to its citizens. The national strategy, however, has to take into account the fact that institutional arrangements in rural communities are not uniform and that some communities have local bodies in place that can implement a relief program with relative eas. While others do not and would require additional support to be prepare local bodies to facilitate fair and equitable distribution of relief (in food / cash)to implement such activities called for a pilot to test methods, identify key issues and find solutions to address them. The relief efforts were piloted in 12 communities in 6 Provinces (Kandahar, Panjshir, Kunar, and Bamyan, Jawzjan and Badghis).

The pilot allowed for the Capacity Building Division to try out

- the implementation strategy (# of visits, type of engagement with CDCs and other key actors in the absence of community consultations, cash vs food, etc.)
- awareness raising around COVID-19
- updating the community profiles (in CCAP)/identifying vulnerable groups (e.g. IDPs, Returnees/ Economic Migrants)
- targeting/Beneficiary Exclusion Approach
- food packages content and decision-making

Each province documented their findings/issues which were then further elaborated upon during virtual workshops with Provincial Trainers (those who had been carefully monitoring the pilots in their areas). The workshops were an opportunity to engage Provincial Trainers from various provinces (some 20 Provinces attended) and consider different contexts, key issues, potential solutions and their implications, and delineate courses of action. The findings have been incorporated into the implementation guidelines and government trainers have been advised of the changes.

2. Key Findings and Proposed Action

The overall design of the program works. However, there are key issues that must be addressed for the roll-out.

a) <u>Number of Community Visits by Field Responders (FRs) to complete the work:</u>

The guidelines for the work had outlined 3 visits, with the 3rd visit being the distribution event (unless FRs chose to conduct 4 visits in larger communities). The feedback from field teams, however, highlights that visits should be a minimum with a 5th visit as an option in case of large communities. This is because more time is needed to properly update the community profile and to complete the various activities (outreach around the relief efforts, awareness raising around COVID 19, the identification of beneficiaries, special considerations for the 'very poor' (largely women-headed households, or households headed by elderly, disabled or drug-users). This means that the number of visits for the REACH program (non-CCAP areas where Community Profile data) will have to be increased.

b) Field Responder / CDC and Community Leaders Engagement:

Given how COVID-19 spreads as well as the Government guidelines to keep meetings to a maximum of 10 persons, the usual, participatory community consultations in the COVID-19 Relief Initiative are suspended and all work will proceed through elected representatives (CDCs) and other key leaders (elders, imams/ mullahs, teachers) if their age permits (No one above 55 should have a managing/paper work role in the distribution events) as well as Community Participatory Monitoring Team members. The 'Relief Committees" shall include at least 2 CDC Office Bearers and the CDC members who head the Youth and Vulnerable Group Development Committees. In addition, the various neighborhood imams/mullahs, and teachers should be present (if their age permit). It must be clear, however, that CDCs are in the driving seat. They are the signatories for the funds and are held accountable by GoIRA for the program implementation). The roles of imams/mullahs is to lend support and supplement the health messages around COVID 19, to keep the CDC on track in terms of targeting and ensuring that the poorest (particularly women-headed households) are reached, and to assist with the monitoring. Teachers are asked to work with the CDC youth sub-committee to update the community profiles and the VGD committee will ensure that 'very poor' households are included and that special arrangements are made to deliver food to them if needed.

c) Awareness Raising around COVID 19:

In some areas (e.g. Uruzgan) and communities, there is a belief that COVID-19 is not real, but invented. In other areas and communities, the illness is not taken seriously, and social distancing is not practiced. The potential strategies include:

- i. The Ministry of Religious Affairs and Haj (oversees Imams/mullahs) to instruct all Imams/ Mullahs to conduct awareness campaigns around the implications of COVID 19 and what social distancing and protection entails; (MRRD /CCAP leadership and WB to raise this with H.E. President Ghani).
- ii. Discussions with COVID 19 Relief Committees to include the need for the entire community to protect elders, the weak, and the sick from contracting the illness.
- iii. Create a table (that is updated daily by HQ) that shows the number of people infected in the world, nearby countries and Afghanistan to illustrate risks when not distancing when raising awareness in communities
- iv. Remind people of Qur'anic messages in which the Prophet (PBUH) speaks of health behavior during pandemics.

d) Updating the Community Profiles:

Updating the Community Profiles is relatively straightforward as current CCAP Community Profile Forms retain most of the data fields collected during the initial CCAP work in 2017 and staff and communities are familiar with the process. However, because of the link between the size of COVID 19 Relief Grants and the Communities' Household Counts, there is a tendency on the part of communities to inflate household numbers. This is not to say that increases in households in communities do not occur, but Field Responders will have to learn how to deal with 'real' increases in numbers and their verification and 'fabricated' increases in numbers and recognizing these.

To start with it helps to consider the type of household increase. For instance, IDPs and Economic Migrant (where entire kin groups/ large families have moved to escape conflict or from remote and / or rainfed areas to irrigated plains near urban areas where more work is available) tend to settle in clusters in communities (often forming new mohallas many of which are called Nawabad (signaling a new settlement); whereas Returnees tend to settle more atomistically. Further, staff have noted that in the central provinces communities are seeing an influx of households that have moved from Kabul to stay with relatives in rural communities to avoid COVID 19. There is also the issue of households splitting up (brothers leaving one household to create their own and sons getting married and forming new households).

This means that IDPs and Economic Migrants are easier to verify as they settle in groups on vacant / open land, whereas returnees, COVID 19 migrants, and newly formed households are likely to move into existing compounds. To make things easier, the forms now reflect the various types of in-migrant allowing the field and

management staff to easily see which household increase is due to in-migration (and which type) and due to organic shifts within communities. Increases that are more than 10%, it has been agreed, will require verification by Government or NGO Field Responders.

e) Targeting / Exclusion of the Food Secure

The targeting process is simple and focuses on the identification of households that remain food secure despite the economic implications due to COVID 19. Food Secure households are identified by reviewing the Well Being Analysis (Better off and Middle Groupings) for each election unit. The process works well; but the inflation of households (noted above) presents a challenge. The solution, according to the Provincial Trainers, is to withhold the 90% beneficiary policy until the Community Profile is completed. This is because if the 90% beneficiary number is known it provides a reference point for household inflation. Further strategies to prevent inflated household numbers are a) a provision in the OM (to be shared with the CDC during visit 1) that should funds be mis-used (including creation of 'ghost' households), future development funds by GoIRA will be forfeited unless the mis-used funds are repaid; and b) a discussion on why the funds available must be allocated to those that are in need.

f) Cash Vs Food

Whilst cash transfers are simpler as there is no procurement and no transport of food items, they also lead to more problems, and in some cases even chaos. Staff reported that during the cash distribution people were pushy, impatient and concerned that they would be missed. Social distancing norms were totally forgotten, and staff found it hard to manage people. Also, those that are food secure – many of whom are influential people – tried to include themselves; but when food was provided the influential people/ better off were less likely to enter into the process. There is also the issue of transporting cash from banks to communities and the risk to CDC members; the fact that men tend to control money and they may use the funds to repay debts, instead of purchase food; the fiduciary risks when it comes to cash and so on. In the end, it was agreed to go with food relief packages.

g) Elite Capture

The CC has made numerous improvements (from NSP) to prevent the incidence of elite capture (elites claiming they brought the resources, elites influencing decisions about where resources should go, or elites allocating resources in favor of their own families / clan). At the community level, a key actor to look out for is the 'Malik' (popular reference) or Qaryadar. In the pilot, it was observed that in one community, a Qaryadar tried to provide the list of poor households and intervene in the process. In other communities, influential tried to include themselves. Stopping influentials from interfering is generally straightforward, but stopping Qaryadars often requires the support of District Governors who then instruct Qaryadars to back off. (Note: this was often the case during the CDC elections when Qaryadars realized that the system had changed, and each pocket of the village had representation now and they could no longer put 'their people' on the CDCs). Whilst the 2016 Sub-National Governance Roadmap makes the roles of Qaryadars clear, their interference in the development process continues and must be managed by field and provincial staff.

There is also some concern around District Governors given that the roll-out will occur district by district with relatively large numbers of communities needing to procure food in limited number of markets. It might be helpful if the President's Office could instruct the DGs and PGs that any attempts at influencing the Relief Efforts in terms of procurement of food, etc. will have consequences.

h) The Content of Food Packages and Regional Variation

There are a couple of issues around food packages: First is the issue of differentiated food packages and the kinds of compromises that are acceptable. In some areas people do not want rice but instead want only wheat (in terms of carbohydrates) and this is likely due to poverty. In fact, very poor and poor households prefer the package to consist of wheat only so that it can provide food for many weeks. Provincial staff agreed that one carbohydrate (either rice or wheat) can be dropped but not the beans, nor the soap. Secondly, many noted that food re-packaging presents an opportunity for cheating and corruption. It was agreed that the program will calculate what to be distributed based on pre-packaged items (50 kg wheat, 28 kg rice, 1 ser beans; 5 liters oil).

People may wish to forgo oil. So, it may be possible to provide 100 Kg (2 packages of wheat), 1 ser of beans, and 4 bars of soap. There are also different types of flour and in some areas, people prefer the hardier unprocessed flour and that should then be chosen.

i) <u>Decision-making regarding Food Packages</u>:

There was no agreement on the question as to who will make the decision about what will be in packages. In some provinces, PTs preferred to have provide a pre-decided menu (in consultation with communities in terms of their preferences), in other provinces, leaving the decision to the CDC is preferred. The argument against letting the CDCs decide is that it leads to much argument and discussion and takes considerable time. A solution might be to let provinces proceed as they think best and let them make adjustments once they have tried their desired method in a sufficient number of communities.

Table K2: Challenges and Recommendations (Urban)

S. No.	Challenges	Recommendations
1	Late mobilization at subproject sites have caused delay in the subprojects implementation process (community members can't come repeatedly at projects implementation sites, this makes gap between community and the program)	It has been communicated through the relevant units. The FP should consider the community members concerns and work closely with them to achieve the planned goals timely
2	Some subprojects were not implemented as per proposals requirements	The FP should increase their supervision monitoring on subprojects and ensure that the construction works are conducted is accordance to the proposal requirements.
3	Building trust among community members is out of FP control: because, its roots depends to past history, the complexity of tribal compositions and social power.	The FP and PMU has to pay attention to build trust among their staff by sharing openly their dissatisfaction of the works, understanding each other problems, increase their coordination meeting and jointly prepare their monthly, quarterly and annual plans.

ANNEX L: High Risk area Implementation report

a. Rural

The CCNPP is one of the flagship program of the government within Ministry of Rural Rehabilitation and Development (MRRD) which delivers developmental services across the country.

Since this program is designed to deliver developmental services to both urban and ruralareas by considering insecurity where government has little to no control of the area, the local communities are keen to support and express their eagerness toward developmental activities, specifically in their own areas by taking permission from anti government elements.

As the program implementation has benefited from the large support from the community members, it can also count on continues security risks of our colleagues. Our staff from FPs,PMUs and CDCs should be willing to accept a level of risk in doing their work. They make themselves vulnerable to the risks, and the risks include kidnapping, killing, warning and threats. According to the below report, during the period of 2017 to 2019 this statistical-report produces comprehensive information at provincial level. The overall insecurity incidents that has taken place in overall 31 provinces, kidnapping incidents are ranked as the highest since 2017 followed by threats, warning and being killed. These are considered significant and steps should be taken to address them. The purpose of this report is to identify the insecurity incidents and vulnerabilities related to the program implementation.

Since 2017, the insecurity is the most commonly given reason for the challenges that are in place. In order to address and identify the insecurity situation of CDCs and communities the High Risk Area Implementation Unit (HRAIU) conducts an assessment every 6 months. The assessment is valuable and insightful with possibilities and scope to evaluate the security situation. It reveals the true security status by assessing active and potential security incidents and threats that are evading from our existing program activities.

The higher authorities at provincial level including RRD director, PMU and FP provincial manager set up the security status of CDCs into three categories. The CCAP uses the following categories to classify communities: 'partially insecure', 'highly insecure' and 'extremely insecure'. These ratings are determined and updated on a semester basis (i.e. once every 6

months). Based on the data received, (below table) there are a total of 3,938 insecure CDCs. The number of extremely insecure are 456, followed by highly-insecure i.e. 1442 and the partially-insecure are 2040.

Table L2: 6th Semester Insecurity Ranking Report

Definition of Insecurity and its category based on High Risk Strategy:

The areas/CDCs are categorized in the following three categories based on the existing risks Partially Insecure, High Insecure and Extremely Insecure. These ratings are determined and updated on a semester basis (once every six months) to assess security status of CDCs and to see work feasibility in an area.

Highly Insecure:

A district meets at least 4 of the 5 criterias stated below for over 4 months in a given semester will be considered 'highly insecure'.

Criteria:

- Limited government presence at the district level defined as limited government or no visible presence of government on the ground. The Government here includes the district governor, his/her office, ANP, ANA, NDS ALP, state judicial authorities etc. In most cases, weak presence implies that these persons/ institutions may be completely absent or when present, are not easily accessible by the communities in the district.
- Travel with project documents in some or all parts of the district is not possible.
- Occasional AGEs presence on the route from community to district center & vice versa.
- Security incidents and threats from hostile insurgent groups or other types of armed actors to the CDC members,
 CCAP staff and FP personnel and these should be evidence-based, with FPs reporting each such threat/incident to their management or CDCs to the PMUs during the weekly coordination meetings at the PMU).
- Military operations lasting up to a month within a 6-month period.

Note: If a district meets more than 1 but less than 4 of the criteria in a given semester it will then be classified as "partially insecure.

A district which meets at least 4 of the 5 criteria stated below for over 4 months in a given semester will be considered 'extremely insecure'.

Criteria:

- Very limited government presence in the district (including but not limited to Governor, Governor's office, ANA, ANP, NDS, ALP, judicial offices, other line ministries, etc.).
- CDC members can not disclose their identity, except to CCAP/ FPs Staff
- Travel with project documents by FP/ CCAP staff is not possible
- More frequent presence of Armed Opposition Groups (AOGs) on the route from community to district center;
- Military operations more frequently/longer than a month in 4 months

CCAP will proceed in "Extremely Insecure" districts only on an exceptional, approved basis.

Insecurity Ranking Process:

The District Government, Social Organizers, and Monitors collect the data to rank the districts and communities, then the district manager verifies the data and final approval is given by the provincial manager. After that this ranking is added into the database. The District Manager reviews and verifies the data. The District Database Officer then enters all the data into the HRAIU database. The insecurity map is updated on semester basis as well.

Withdrawal of Insecure CDCs and shifted to Kuchie's Program

Due to high-levels of insecurity, project implementation was not possible in 306 CDCs. Therefore, it was decided that such number of CDCs be shifted to Kuchie sub-program. The detail information of such CDCs are mentioned below.

Table L3: List of insecure CDCs that were moves to the Kuchie sub-program

List of Insecure CDCs shifted to the Kuchie sub-program								
No	Province	District	# of CDCs					
1	Paktya	Wuza Zadran	8					
2	Khost	Nadir Shah kot	37					
3	Farah	Farah	1					
4	Kunarha	Daripich	21					
		Chawky	56					
5	Nimroz	Kang	3					
6	Herat	Zindajan	13					
7	Hilmand	Garamsir	167					
Total	- I	l	306					

Cancelation of Activities:

Currently 668 CDCs are suspended in 5 provinces in 11 districts due to several reasons; insecurity, social problems, women participation and a smaller number of HHs.

Since the inception of the program, the work has not begun in the Uruzgan province despite many efforts by colleagues at the field level. Despite some colleagues were kidnapped by AntiGovernmentElements still the permission to continue the program was not given. The same is the case with Wardak province, an insurgent group known as Alipoor insurgent group does not allow the program implementation. The field staff who wanted to implement the program were kidnapped and tortured, and were warned not to enter the area again.

In Ghazni province, CDCs merged with other CDCs due to lower number of HHs. There are other social issues with 4 CDCs that have less than 25 HHs, and these CDCs are not willing to join other CDCs. In 2 insecure CDCs of this province work is not allowed by ArmedOposition Groups (AOGs). In 13 insecure CDCs of Paktiya province, women participation is not allowed by AOGs, and work can be continue without women participation. Similarly, in Paktika province 78 CDCs have insecurity problems and women participation is not allowed.

Table K4 below shows information regarding problematic and suspended CDCs

Table L4: Problematic and Suspended CDCs

No	Province	District	Reason of St	uspension			Total	Reason of Suspension
			Insecurity	Due to insecurity Women Participation	Merge d with other CDCs	Social Issue		
1	GHAZNI	Ghazni Center	11				11	Due to insecurity problem.
		Nawur	2			5	7	Due to insecurity implementationwith 2 CDCs was not able tostart, Similarly, the work in some CDCsduring theCDP phase was ceased. In addition, work in 4 CDCswith less number of HHs and who are not willing to merge with other CDCs was never started
2	PAKTIKA	Jani Khel	11	35			46	Insecurity and women inclusion were not possible
		Sar Hawza	7	25			32	
3	PAKTYA	Ahmadaba		1			1	Insecurity and women inclusion were not possible
		Chamkanay		4			4	1 CDC is (Niaz Big) with less household number, 1 has (Shenkai)
		Mirzaka		13			13	Social Problem and 2 were in NSP black list, total 4 CDCs.
								13 have social problems
4	URUZGAN	Chora	198				198	Insecurity, AOGs do not allow the program
		Tirin Kot	130				130	
5	WARDAK	Hisa-I- Awali Bihsud	201				201	The gun men related to Alipoor do not allow our staff to the field, we have very limited staff in Hesai Awal Behsod as they are from Hazara trib.
		Jalrez	25				25	Due to the clash between the Alipoor people and AGE we cannot visit the CDCs and their projects.
		11	585	78		5	668	

Recommendations:

The above number of communities are suspended for along time ago. The recommendation is either to withdraw and shift these number of CDCs within a district or province in more secure areas or let them continue the program in most insecure areas without participation of women so that people of insecure area will not be deprived from such developmental program. For social issue a specific time should be considered to inform communities if the problem is not solved then the program will decide to shift these number of CDCs to another area of the country. Also the CDCs with lower number of households within a community that does not meet the requirements, either let them continue the program with less number HHs or go for withdrawal.

b. Urban

Security Report

Key Achievements:

- Prepared and developed safety and security management policy;
- Finalized safety and security management annual 2020 plan;
- Prepared emergency telephone numbers contact sheet and emergency instruction checklist;
- Prepared and finalized smoking policy;
- Created security notifications group for office staff in Viber;
- Equipped safe rooms with necessary supplies needed for emergency situation;
- Equipped PIU watchmen with VHFs and trained them accordingly;
- Monitored regularly staff movement from and to the office during official work hours;
- Prepared safety and security training materials for watchmen and conducted training for them;
- Security measures such as stone walls, barbed wire, security mirrors and serious body search of the employees and guests were made at the main entrance gate;
- Security cameras were installed at the parking yards of the office;
- Prepared fatality reporting template;
- Established linkage with regional police and NDS officers;

Precautions related to COVID – 19 disease (Urban):

- Purchased hand sanitizers and Masks for all the staff;
- Purchased the body temperature testing equipment and body temperature testing of staff and visitors;
- Purchased the pump for spreading antimicrobial medicine everywhere in the office.
- Educated every staff member how to protect themselves against this deadly virus through research medical instructive documents;
- Shared precaution against COVID 19 to the staff through Viber group;

Next Quarter Plan:

Activate office security alarm;

- Installing security TVs and configuring PIU security cameras at the new security office
- Conducting safety and security drills for the staff
- Follow up of six watchmen recruitment process with HR;
- Visiting offices for checking security settings, identifying problems and finding ways for solving the problems
- Conducting training for all watchmen with regard to the office safety and security measures.

Citizens' Charter Biannual Progress Report
